Why Do We Have Such Loyal Customers?

It's true! Our customers are among the most loyal in the compounding pharmacy world! In a recent survey, all respondents ranked our favorability as HIGH to VERY HIGH! Once a compounding pharmacy begins to use our services they rarely go elsewhere. Among the reasons are that they find our accuracy, turnaround time, and responsiveness to be much better than other labs.

Who Are We?

CIAL (Compounder's International Analytical Laboratory) is exclusively dedicated to working with 503A, 503B and Home Infusion Care pharmacies. We also are a testing service for the companies that provide the APIs to compounders, to assure the highest quality. That's all we do, and we've been doing it for 15 years, so we understand your unique needs and challenges.

We are FDA and DEA Registered. All of our people are rigorously trained to test your compounded preparations. Our full-service Microbiology department tests your sterile products in an ISO 5 environment using an enclosed system which precludes the possibility of contamination. Our Potency, Stability, and Special Chemistry departments use absolutely the latest and highest quality instruments. In fact, our lab is better equipped and more advanced than Big Pharma's labs. ***We know because we've worked there!***

Personalized Service

If there is ever a problem, we work with you to find solutions to your particular challenges. We make sure you are not left to figure out on your own what went wrong, but we come alongside, put our collective heads together and come up with practical solutions based upon our many years of experience.

Regulatory Support

Many of the conversations we have each day with our compounding customers revolve around the question, "What is required and how do I meet my State Board or FDA regulations?" We may not know all the answers, but because we work with compounders all over the US, we probably have a fairly good idea of how best to meet those requirements. If you are inspected, we are always ready to provide the information and support you need.

Give Us A Try

We think you will find working with us a refreshing experience! We are centrally located in the US (Colorado) so samples can easily be shipped to us overnight from where ever you are located.

We look forward to working with you!
